AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method of facilitating use of a graphical user interface toolbar, comprising:

providing to a user an initial set of toolbar buttons in a toolbar <u>without providing to the user a subsequent set of toolbar buttons in the toolbar</u>;

receiving a single indication from the user; and

[[providing to the user a]] <u>replacing the initial set of toolbar buttons with the</u> subsequent set of toolbar buttons in the toolbar [[at least in part]] in response to the received indication <u>such that the initial and subsequent sets of toolbar buttons are not simultaneously provided to the user in the toolbar</u>.

2. (Original) The method of claim 1, further comprising:

providing to the user additional sets of toolbar buttons in the toolbar at least in part in response to additional received indications.

3. (Original) The method of claim 1, wherein each toolbar button within the initial set of toolbar buttons is related to a common class of functionality.

4. (Original) The method of claim 1, wherein each toolbar button within the subsequent set of toolbar buttons is related to a common class of functionality.

5. (Canceled)

6. (Currently Amended) The method of claim [[5]] <u>1</u> , wherein the toolbar includes [[at least one other toolbar]] <u>a search</u> feature <u>user input portion</u> in addition to the initial set of toolbar

4

buttons, and the [[at least one other]] <u>search</u> feature <u>user input portion</u> is not replaced by the subsequent set of toolbar buttons.

7-12. (Canceled)

13. (Currently Amended) An apparatus, comprising:

a processor; and

a storage device in communication with said processor and storing instructions adapted to be executed by the processor to:

provide to a user an initial set of toolbar buttons in a toolbar <u>without providing to the user a subsequent set of toolbar buttons in the toolbar</u>;

receive a single indication from the user; and

[[provide the user a]] <u>replace the initial set of toolbar buttons with the</u> subsequent set of toolbar buttons in the toolbar [[at least in part]] in response to the received indication <u>such that the initial and subsequent sets of toolbar buttons are not simultaneously provided to the user in the toolbar</u>.

14. (Original) The apparatus of claim 13, wherein the instruction are further adapted to be executed by the processor to:

provide to the user additional sets of toolbar buttons in the toolbar at least in part in response to additional received indications.

15. (Original) The apparatus of claim 13, wherein each toolbar button within the initial set of toolbar buttons is related to a common class of functionality.

16. (Original) The apparatus of claim 13, wherein each toolbar button within the subsequent set of toolbar buttons is related to a common class of functionality.

17. (Canceled)

18. (Currently Amended) The apparatus of claim [[17]] 13 , wherein the toolbar includes [[at least one other toolbar]] a search feature user input portion in addition to the initial set of toolbar buttons, and the [[at least one other]] search feature user input portion is not replaced by the subsequent set of toolbar buttons.

19-20. (Canceled)
